

## Plateless TPLO Fixation

MECHANICALLY STABLE

TITANIUM CONSTRUCTION

ZERO PROFILE

EverLok™ Plateless TPLO Fixation is a departure from traditional TPLO orthopedic implants - we remove the plate completely. Our innovative locking mechanism between the two implants ensures long term fixation while allowing for primary bone healing. Simplify your surgery while removing the complications of a standard TPLO plate.

### ▶ Simplify Surgery

EverLok procedures are less invasive and require a smaller incision on the patient compared to a standard TPLO surgery.

### ▶ Reduce Inventory

Our innovative design is universal for both the left and right side of the patient.

### ▶ Patient Benefits

Less trauma during surgery and the removal of the standard implant can mean quicker return to function and potential reduced infection rates from plate complications\*.

*\*Statistics show no difference compared to standard locking TPLO plate.*

### EVERLOK TPLO PRODUCT BENEFITS:

- ▶ Designed in partnership with leading veterinarian surgeons
- ▶ Implant grade titanium construction
- ▶ Manufactured at ISO certified and FDA regulated facilities in Germany
- ▶ Lot controlled for implant traceability
