

Liberty Lock™ TPLO Implants

PolyAxial Locking System

- ▶ ANATOMICALLY SHAPED
- ▶ LOW PROFILE - 3.0MM
- ▶ LIMITED CONTACT

Liberty Lock™ TPLO Implants give you the freedom to place implants where you want them. No surgery is the same - why limit yourself to a fixed angle orthopedic implant?

▶ Compatibility

Our innovative design is meant to utilize your existing tools and inventory with standard locking screws - no need to transition or purchase new equipment.

▶ Function

Experience more surgical flexibility with these Polyaxial implants. Screws can lock at multiple angles for a tighter placement, which can decrease patient trauma.

▶ Fitment

These low profile plates are pre-contoured and feature a bending zone to allow for the best possible patient fitment.

LIBERTY LOCK TPLO PRODUCT BENEFITS:

- ▶ Designed in partnership with leading veterinarians
- ▶ 316LVM Certified implant grade stainless steel
- ▶ Manufactured at ISO certified facilities in the UK and Germany
- ▶ Lot controlled for implant traceability
